

SOIL ASSOCIATIONS*

- 1 Sarpy-Onawa-Haynie association: Deep, excessively drained to somewhat poorly drained, nearly level and very gently sloping, silty and clayey soils on bottom lands of the Missouri River Valley
- 2 Aowa-Alcester-Kennebec association: Deep, well drained and moderately well drained, nearly level to gently sloping, silty soils on bottom lands and on foot slopes
- 3 Crofton-Alcester-Nora association: Deep, well drained, gently sloping to very steep, silty soils on loess-mantled uplands and on foot slopes
- 4 Moody-Thurman-Aowa association: Deep, moderately well drained to somewhat excessively drained, nearly level to moderately steep, silty and sandy soils on uplands and on bottom lands of narrow drainageways
- 5 Moody-Nora-Crofton association: Deep, well drained, nearly level to strongly sloping, silty soils on loess-mantled uplands
- 6 Kennebec-Baltic-Calco association: Deep, moderately well drained to very poorly drained, nearly level, silty and clayey soils on bottom lands
- 7 Nora-Crofton-Alcester association: Deep, well drained, gently sloping to steep, silty soils on loess-mantled uplands and on foot slopes

*Texture named in associations refers to the surface layer of the major soils.
